**Subject:** EDSP Prioritization - 2 Generation Reproductive Study List

Hello Anna,

Attached is the list of active ingredients with 2-generation reproductive studies (Chemical List tab of Excel spreadsheet), as well as a draft report on the methods and overall findings. If you'd like us to make any changes to the report or provide signed copy, please let me know. If you have any questions or suggestions as you go through these, I'd be happy to make edits or set up a check-in meeting, as needed.

I'm working on a similar spreadsheet and report for the corrosive active ingredient list and should get that to you tomorrow.

Thank you again for giving RAB8 this opportunity to get involved with the EDSP project. I really appreciate all the feedback you've provided and your patience on the report.

Thanks!  
Brandall
